

WORKSHOP

AI FOR POLICYMAKERS

CONTEXT

AI has reshaped our lives, influencing everyone from students to MPs.

We're at a crucial point in AI's future, requiring collaborative engagement, thoughtful deliberation, and active consultation among all stakeholders to create a robust, sustainable regulatory framework.

WHY THIS WORKSHOP?

Policymakers are crucial in fostering innovation and responsible AI. However, the rapid evolution of AI demands that they stay informed.

A solid grasp of AI's basics, benefits, and challenges would enable them to ask the right questions and drive meaningful progress.

To meet this demand, the Institute for Governance, Policies and Politics (IGPP), New Delhi, is hosting a workshop titled, ‘**Artificial Intelligence for Policymakers.**’

OBJECTIVES

- To equip policymakers with fundamental knowledge of AI.
- To help policymakers keep up with the latest developments in AI .
- To have comprehensive understanding of what AI means for different sectors and its use-cases.
- To help policymakers develop adequate understanding of the opportunities and challenges of AI and make thoughtful and informed decisions.

STRUCTURE OF THE **WORKSHOP**

IGPP is organizing an engaging workshop on AI. This high-impact event will feature a series of sessions exploring AI's potential to transform various sectors, including healthcare, education, security, agriculture, and the future of work.

How?

Attendees will gain insights from **AI experts**, including industry leaders, ethicists, and tech innovators. **Interactive sessions** will help parliamentarians address queries, understand AI's benefits and challenges, and equip them to lead discussions relating to AI regulation.

TWO DAY WORKSHOP

The two-day workshop will feature **four sessions** on different themes to enhance policymakers' understanding of AI.

TARGET AUDIENCE

Policymakers, legislators, and government officials involved in technology, innovation, and public policy.

THEMES

Exploring the Foundations of Artificial Intelligence

- Understanding the Basics of AI
- The Fuel of AI: Data
- The Future of Work: AI and Automation

AI's Potentials and Challenges

- AI in Education and Healthcare
- Public Sector AI Use Cases
- AI and Climate Change: Opportunities and Risks
- AI-Driven Misinformation and Digital Deceptions

Ensuring Responsible AI Development

- Human-AI Interactions
- Bias and Fairness
- Transparency and Explainability
- Responsible AI

Global Practices on Regulation of AI

- Approaches to Regulating AI
- The EU's AI Act
- AI Regulation Practices in Other Countries

TAKEAWAYS FROM THE **WORKSHOP**

- Developing foundational understanding of AI among policymakers, enabling them to engage in informed decision-making.
- Policymakers will gain valuable insights on opportunities and challenges offered by AI.
- Policymakers will be equipped with a broader perspective on AI, considering global advancements and best practices.
- Policymakers will have in-depth knowledge of India's AI trajectory, exploring past developments and future trends, fostering an India-specific approach to policy formulation.
